

# OMRON

## AnyFeeder Solution

COMPLETE FLEXIBLE FEEDING SYSTEM

# Faster Setup, Rapid Changeovers

With intelligent software and fully integrated components, **Omron AnyFeeder Solution** is designed to help you move faster in every stage of the process, from evaluation through operation.

ACE Sight software provides easy integration of AnyFeeder, vision and all Omron robots

Complete your feasibility in mere hours

Re-use all emulation elements for commissioning

Use pre-programmed Smart Commands to control the AnyFeeder unit

Automatic calibration between vision, robots and conveyors

Vision

# Optimized to **work together**

UNDER A SINGLE POINT OF CONTROL

Motion

Robots

EASY PART CHANGES

Get up and running fast  
with wizard-based setup

Switch between emulation  
and production modes for  
easier troubleshooting

Seamless, software-based  
product changeovers in  
minutes

Recipe Manager simplifies  
training and operations

Save **time** and **money**  
across the entire process

FROM DESIGN TO IMPLEMENTATION TO  
PRODUCT CHANGEOVERS

# Wide Range of Applications

The Omron AnyFeeder Solution is ideal for applications featuring varied parts and frequent changeovers.

# Integrated, Smart Feeding Solution

Omron **AnyFeeder Solution** combines vision and robotics with our powerful **ACE Sight software** to deliver a complete system for flexible bulk part feeding.

It's a single solution to manage a vast range of part types, and give you the power to make **frequent and easy product changeovers**.

## Perfect **Vision**

Visual part recognition frees you from the limits of mechanical feeding, speeding up configuration and eliminating the need for manual feeder calibration.

Integrated vision architecture allows for high-speed latching of robot positions and a reduction in cycle time for products requiring fast inspection and orientation after pick up.

## Unmatched **Versatility**

One AnyFeeder can replace several conventional feeders on your line

### **1** REARRANGE

Automatically flips/shakes parts to separate and position them

### **2** RECOGNIZE

Identifies part position and orientation for picking

### **3** REFINE

The integrated vision refinement on the fly feature allows for visual verification of parts, increasing placement accuracy to within 17 microns.

# One Company, One Solution

Omron products make it easy to automate. Each of our components work together out-of-the-box, and combined with the powerful **ACE software** they become a fully-integrated system that can be customized to your application.

# Global Collaborative Network

Robotics Expertise and Machine Automation Support provided by a **unique global team.**

40 COUNTRIES

150 LOCATIONS

3000 APPLICATION ENGINEERS

Planning.  
Implementation.  
Support.

Omron is ready to help you every step of the way, anywhere in the world.

**Give us a call.** Our expert feasibility study will help you configure the right solution for your application.
